Prasadi Souvenir-2070 is the true reflection of Prasadians and it is our great privilege to be the gem of this gallery, gratitude of which is beautifully expressed in the souvenir. The souvenir is not only a bundle of pages for us but our feelings, memories and nostalgia that we had together. It is a true souvenir from the Academy that we get, which always inspires us not to be an ex-Prasadian but the Prasadian in the ages to come.

Prasadi Academy is really an academia where students gain knowledge secluding themselves from other activities. We are being taught to be focused on our aim in the most conducive environment possible with complete dedication. We express our sincere gratitude to the Academy for being with us all the time and providing us with platform like the Souvenir to exhibit our hidden talents, feelings and experiences through our words.

We deeply acknowledge the encouragement and support from all the teachers & staff in the very tiresome hours of preparation of the Souvenir and put across our heartfelt indebtedness for their help. At the same time, we express our earnest gratefulness to respected Chief Mr. Bikram Rai and inspiring Mr. Principal for their support and instigation to shape the Souvenir in this form.

We highly appreciate comments and critical appreciations from our valued readers, which will play pivotal role to make further improvement in the Souvenir.

First and foremost, I would like to thank you with my inner heart for giving me an opportunity to write some few words of encouragement for the PRASADI SOUVENIR 2070. On the behalf of the Higher Secondary Education Board (HSEB), I would like to provide my best wishes for all the students who are involved with my full support. For achieving the goal and enlighten them to gear up for making their dream come true I pray to God to provide them full of strength and positivity. I would also like say special thank you to Prasadi Academy management for providing the students with such a motivating opportunity.

(Hem Kumar Mishra)

HSEB
MESSAGE

It is said that a journey of thousand miles begins with a first step forward. It gives me immense pleasure to see that we have successfully completed one and half decade in our journey firmly inculcating truth, morality, value along with state of the art education to live up the expectation and need of present time in our students.

At present, Prasadi is the first choice of every parents and wards to pursue higher secondary education as she has proven herself as an epitome of excellence in higher secondary education. I believe she would continue to inspire and educate scores of minds with the same spirit in the years to come, which fills my heart with profound pride and fulfillment alongside humbleness as a founder of the institution.

Prasadi souvenir is a mouthpiece to express the feelings, memories, experiences & creativity of Prasadians during their study years in Prasadi Academy. I am sure the writings and brief autobiographies of students will fill their heart with positive vibes whenever they go through the souvenir in distant future.

At the end, on behalf of the administration, I express my wholehearted appreciation to all for their indefatigable work to bring the souvenir in this form.

**Friends**

We were about three or four years old when we were enrolled in a school for the first time. The first day at school was an entirely new experience for us. The mixture of emotions, including the feelings of excitement and a bit of awkwardness had made that moment even more special and an inevitable part of our cherishable memories. The first day at school was our first independent attempt to make friends, which might have continued to first few months at school.

Then as we grew up and got promoted to higher grades, we began to make more friends. In junior classes, friends were merely the classmates or playmates for us but as we grew up friends occupied an important part in our lives and became more than just a playmate. Our friends' attitude towards us and our activities mattered more than anything to us. The longest period when we remained among the same group of friends or in a familiar company was during the school years. At those moments the company of our friends lured us to such extent that we began to spend more time with them than with our parents. we shared secrets, had gossips, made fun and laughter. By the time we were at the end of our school life we had developed so much bonding among ourselves that we thought that our life would be rather difficult and incomplete without them. The last day at school had a different scenario than the other normal days. We exchanged good byes and promised to remain in touch. There were eyes all wet and cheeks with tears rolling down.

But soon after we reached college, we began to make new friends. The new faces around us in the college became our friends and we added a lot of new names to our “friends list”. We are people and have to live among the people. Exchanging thoughts and ideas help us understand each other and know more about the world. Making friends means learning more and understanding each other. Friendship teaches us to share and help. The teachers, our elders and our parents teach but our friends share and sharing is the easiest but the most effective way of learning. We share not only our sorrows but also our joys with our friends. Sharing sorrow is to reduce half of the problems but sharing joy is adding happiness to our lives.

Life is an ongoing journey. In this journey we come through different places and make many friends. The human life is not merely a word of four letters but is a really precious and valuable treasure of new experiences and memories. Friends and friendship are an important part of our lives. The friends that we made in the earlier days are the part of our beautiful reminiscences and the friends that we make at present are a part of our journey who help us to enrich every memories that we live!

XII  D5 Science
I remember the day pretty clearly; it was a calm morning on 2nd Shrawan 2068. Unlike the weather that day, I wasn’t calm at all. An orchestra of emotions was playing out loud in me. I was nervous, excited, curious, enthusiastic, all at the same time. After having been enrolled in a school with a familiar environment for so long and then stepping out to the new environment of a new institution with a whole lot of new people will definitely be tough. But I was ready for all it had to offer. So in my crispy new uniform, I headed out for my first day at Prasadi.

As I entered through the front gate, I had butterflies in my stomach. I could see some teachers helping out the new students; we were asked to wait for sometimes until we found out the sections we were placed in and then we were sent to our classes. It felt good to see some familiar faces back from my school. The day went fine. There were introductions and interactions between the teachers and the students and brief lecture from chief about the rules and ways of Prasadi, and of course the trademark of Prasadi: studying on the first day.

I had heard about Prasadi earlier, about its strict rules and level of discipline to be maintained here. Since I came from a very reputed school of the country where I experienced strict discipline, I didn’t think it would matter much to me. But my college turned out to be even stricter than my school.

During the starting days, things were difficult to manage: the persistent lessons from teachers, the regularity of home works and the rush to utilize the twenty minutes short lunch break. But then with each passing days, it all turned well. I started adapting in the environment of Prasadi, in fact I started enjoying it here, as many of my friends did, without whom, this journey would’ve been difficult. I’ve made many new friends here at Prasadi who have turned out to be great companions. They have made these two years of my life memorable.

I am glad I chose to pursue my studies in Prasadi after completing my SLC. Branching out from studying many subjects at school to a particular stream and bridging the gap wouldn’t have been easy, had I not opted for Prasadi. The teachers here were very helpful, inspiring and encouraging. I enjoyed learning from them. All their teaching, guidance and effort have contributed a lot in my path of learning. I have learnt about a lot of stuffs in Prasadi and I am glad to have been a part of this great Institution. You never know how time passes. It feels like yesterday when I entered this gate of Prasadi and now it is all coming to an end. I’ve had lot of delightful experiences and met many new people at Prasadi. I will cherish every moment of the parcel of these experiences and memories that Prasadi has given me. They are sure to bring a smile on my face every time I recall them. And now when it’s time to leave, I’m sure every fellow student here feels the same as I do: Proud to be Prasadian!

Looking Back the Memories in Prasadi Academy

Now, it’s time to leave Prasadi Academy. It seems just like yesterday waiting in a long line to get a form of entrance exam. But I wonder how fast these 2 years passed. While joining Prasadi I was unknown, alone, strange as friends were few, however, at the end of the stage, I am leaving Prasadi with many friends.

From the first day in class 11 O8 till now in class 12 B5 I’ve gained very good memories. It feels really great to look back for a moment in Prasadi Academy. On the very first day of grade 11, all of the students in the class were shouting “that is Prasadi” while our first teacher started to teach us. After that, load of home works, bag checking rush of submitting homework at the last minutes which turned normal for us as time passed by. I cannot forget my friends with whom I’ve shared every great moment. Laughing, eating, and of course shouting with my bench partners Nikita, Kripa, Alisha, Rikita, and Palistha on class 11. It was great fun and of course returning back with my special friends Pratibha, Pema, Subeena ans Sangita laughing a loud in the middle of the road was great memory.

Walking up to the top floor in class 12 was the hardest thing. Laughing non-stop with my laughing partner Alisha spending great time with my great bench partners Puza and Lasta was the best memory I’ve had in my life. I will never forget dance of picnic, running early in the morning to get inside at 6:40 was most memorable moment.

I would like to thank all my inspiring and friendly teachers who’ve taught me. Their inspiration will always be with me. Every day you all taught us new things in new ways. I feel really proud to be a “PRASADIAN”. Prasadi has taught me a lot like, to be loyal with friends, forgive enemies etc. I hope up-coming Prasadian will also learn same thing. Thank you “PRASADI ACADEMY” to make me part of you.

Flashback

As a normal student I too had a dream of getting a best place for my higher schooling and I didn’t have the best option other than Prasadi, I must say Prasadi gave me the most beautiful moment of my life. From the first day in the college I could feel that my life was changing. I got some wonderful friends and they became close to me very soon. Many of Prasadians said homework troubled them but homework never troubled me. I had nothing to lose before I entered Prasadi but now I have probably the most beautiful gift which I am afraid to lose. I really got very good environment to study but as a matter of fact I might not have utilized it properly.

Grade 11 was really good but grade 12 was one of my dreams came true. Each and every second or minute in 12 were incredible. “RAM SIR I WOULD LIKE TO THANK YOU FROM MY DEPTH OF MY HEART WITH FULL RESPECT” Sir, you might not know what I am thanking you for but really what you did, changed my life. Having fun in class, being with Anuj, sitting in last bench with Suyas, Sanjay just in order to be close to someone would be missed a lot. Writing message and passing would be missed a lot. Ears to teachers but eyes and heart somewhere else would be missed a lot. Really PRASADI, I would be missing you a lot. Surprise entry of our teacher in class for hair checking or bag checking, waiting for holiday’s notice was too crazy, we used to scream as if we had just won a big battle. Jokes of Sarthak were really interesting. Eyes’ talk with special friends, teasing friends, making useless gossips were the wonderful moments. Picnic was nice. We danced too wildly.

Every single moment in Prasadi would be truly missed. Finally I can say “I AM PROUD TO BE A PRASADIAN”.

Thank you teachers with respect! Love you all! Love you Prasadi! Love you sir and love you madams!

XII B3 Mgmt
If you want to achieve success in life, there are only three things to do:

1. Study  2. Study  3. Study

Studying with determination is what makes people successful. From my childhood I have been listening a single sentence from my father “time and money spent on education never go worthless.” So, spend as much time in study as you can and don’t hesitate to invest on study either. Studying hard doesn’t mean studying anything but it means studying what you are interested in. I want to thank my parents that they never compelled me to read what they wanted rather they always encouraged me to study according to my interest. I have seen many students ruining their lives because of choosing the subjects what their parents and relatives forced them to choose. They then blame themselves and their parents for not being able to study according to self interest throughout their lives.

I’d like to share an experience of one of my friends here. Science faculty is still considered as only good subject after SLC; so my friend’s parents forced him to study Science with the dream of making him Doctor. So, he for his parent’s happiness gave farewell to his dream of becoming a successful banker and joined Science in a well known college of Kathmandu. But the pressure of study and pressure from college couldn’t help him to concentrate on laws and principles of Science so he failed in three subjects; Physics, Biology and Mathematics in grade XI and in Physics and Biology in grade XII. Now he is studying his +2 again taking Humanities faculty. So, pressure from his parents made him lose his dream of becoming successful banker and, his parents’ dream of making him a Doctor made him lose precious two years’ time of his life.

‘Always try to be best at what you are good at’. Never fail to recognize your interest and work with determination and dedication to achieve that. Do not compare yourself with other successful person or unsuccessful persons. Compare what you were, what you are and what you will be. Stepping forward with loads of interest on what you are doing prevents you from looking backward in your past. Do not think of being successful without hard work. “Chase excellence, success will follow you” these are the knowledge I got as a Prasadian.

Learning continues throughout our whole life and study enables us to achieve our goal in our lives. I’d like to thank Prasadi Academy, teachers and Prasadi management for providing me proper environment for my study. “I am always proud to be a Prasadian”.

On that day when I entered into my college, I felt that I just got into the restricted area for me. All of them were walking past me and watching me like a mutant. The staff in the management and the faculties seemed to be giants and I was standing with them like a deer stand in a cave of a lion. In my hall all of the students were watching me. My mom always used to say that I was the best. I too believed her before coming to my college, because I was from the kind of circumstance. I was the top student in my class until I finished my 10th standard. Friends tried to spend their time with me. However, in my higher secondary level, I didn’t give much importance to the studies but tried to enrich my practical knowledge.

I realized that my mom lied to me. I saw many people there having extra ordinary knowledge and looking so beautiful and also found some people having nothing in their mind like me. I thought on that day I made a big mistake in my life. Commerce was not my right faculty, but just a wrong ambition for me. My game was over. But my brother said, “Don’t worry my dear! It’s just a day. College will teach you all the things itself”. Those words gave me a little energy. And that was true my college made me a complete girl in few months. My first friends in my college were Sangita and Pratibha. They were the first best friends for me. They were good looking and beautiful. They proved to be very good friend form the very beginning. After that I made all classmates as my friends. Toonisha is just stunning about her humor. She was from Jhapa and had knowledge in all fields. She was an interesting person. Selika was a cute girl and she believed on whatever we told. I love all my friends. I love my classroom and my last bench. So, friends, don’t be afraid of the first day. Those days are the turning point to our life.

In Prasadi Academy

On my first day in Prasadi I was excited but, by the tight schedule and less break a bit disappointed. Thought my college was most boring of all the funniest part was the last period roll call.

The home works were compulsory, strict was the rule. Thought the teacher were all very cruel. A lazy fellow I was and still am. To the home works that I didn’t give a damn.

But soon even home works began to look fun. It felt great to say, “my home works are all done”. The teachers became friends, class turned into a gang I’ll always miss the gossips we had and the songs we sang.

Many new different people here I met, The golden moment with them will I never forget. Can’t explain in words, how good a Prasadian it felt to be I’m proud and happy I was a student in Prasadi Academy.

Make a Right Choice

One big company was having a new staff. The question in the written exam was: you are driving a car in a big stormy night. When you pass by a bus stop you see three people who are waiting for the bus. One old lady who is dying, one doctor who saved your life before and one lady who is someone you have been dreaming to be with you. You can take only one passenger along, which one will you choose? Please explain your reason. Think about it before you read the following.

Every answer has its own reason. An old lady is going to die, anybody should obviously save her first, however every person has to die anyway. You should take the doctor because the doctor saved your life before. That is a perfect chance to pay him back. At the same time some people believe that you always pay doctor back in the future but you may never be able to find the perfect love once you pass this chance.

Among two hundred candidates, the one who was hired didn’t explain his answer. He simply stated “I’d give the car key to the doctor and let him take the old lady to the hospital and stay back to wait for the bus with the lady of my dream.”

By Tenjila Shilpakar

A Painful Departure with Prasadi....

Now the time has come to say goodbye to Prasadi. The two years journey in Prasadi had been really exciting and adventurous for me and had actually gone through a lot more stresses, ups and downs, pressures within these two years, but these stresses also had a hidden excitement. Every moment spent in Prasadi will always remain in my heart as a beautiful memory. I never thought that the departure with Prasadi would be so painful and difficult. When I firstly entered Prasadi, I thought that life in it, would be really boring. Gradually, when time passed I got to realize, how exciting Prasadi was. How can I forget my teachers and their presentation in classes. I had been such a student, who was commonly called for presentations. My teachers used to appreciate me for my confidence and my language of speaking. Prasadi was my first choice and today I can proudly say that it was my best choice.

When I was in grade XI, my only goal was to impress my teachers and secure higher percentage, as there’s a saying “first impression is always the last impression”. But once I was promoted to grade XII, I actually started enjoying my college life. I got to know my friends and my teachers more closely. While talking about my teachers, I think I’ll always be owing to Saroj Pyakurel Sir for making me what I am in Accountancy today. There are some more teachers whom I’ll be missing the most. Bhogee Sir, the class teacher of B’6’ and will miss his joke encouragement, his tough questions in terminal exams which always made me cry thinking that I wouldn’t be the higher scorer. Megh Raj Sir’s way of teaching was literally awesome. Manju ma’am’s encouraging skill will always be missing in my life after leaving Prasadi. I will always miss RKN sir’s dialogue “ek jhapad handinchu”. How can I forget Tara ma’am, who actually took us for a whole year. She was the only teacher who used to give some spare time and crack lots of jokes. Among various memories, my best memory would be Ratna Man Sir’s classes. I still remember he gave me a new name ‘Champ’ which made me feel out of the world. I can never forget the moments which I had shared with my mates. All those gossips, jokes, pranks, games etc. Aah..., how can I forget to list out the picnic day, where I got to know new friends. We literally danced for a whole day.

These were some memories that Prasadi had given me within these two years. Prasadi has actually transformed me from a weak person to a capable one. Today I can feel the difference being a Prasadian. Whenever I’ll be opening the book of my life, I’m sure Prasadi would be one of the most beautiful chapter of that book. Lastly, I would like to thank Prasadi for making me a part of its family.

By Sonisha Maharjan
XII B6 Mgmt
that I got chance to sit with Melu and Chandu. They were too much funny. I also got to know that the business studies and accountancy teachers are same from O’8’. That was also the great thing to me. I not only enjoyed with my old friends but also made many new friends. We used to make lots of noise so Manju ma’am changed the seat and I got to know that I had to seat with Pema and Toonisha. First we were really sad but after some time we three also became very good friends. We enjoyed a lot. In the break time Melu and all other my friend used to play basketball.

One day, when we were playing basketball we forgot that the time was over and we ran to the washroom but one of the teacher told us to stand infront of the punishment zone and told us that he would call chief. But we were lucky that chief sir was not in the college that time and he told us not to be late again and sent us in the classroom. Chief came in the classroom and called mine and Chandu’s name. Oh my god...that was the most frightening day, he told that the next day he would give...
….i.e. punishment. Whole night I was thinking that I would die. I knew that I should have been calm but my heart was beating very loud and fast. The next day Incharge sir called us and said not to do such things but I wondered that when I had not done anything then why me…?????But I was happy with it. Grade XII was the year full of memories for me. Lots of my friends will be missed and I know I’ll be alone but no matter friend are always friends.

Oh god! now it’s time to write the last paragraph but I just want that the two years of my life should again be replayed so that I can enjoy it again. Time and tide waits for no man. So, I will be carrying all those memories with me which were given by my friends, teachers. Thanks to Prasadi and my salute to great Prasadi: “PROUD TO BE A PRASADIAN”

Proud to be a Prasadian

Rajesh Hamal may be proud to be an actor,
Barack Obama may be proud to be a President,
You may be proud on what you are but we are proud to be prasadians.
Malvika Subba is proud to hold the title of Miss Nepal,
John Cena is proud to hold the title of WWE championship,
You may be proud to hold the title of best student,
But we are proud to hold the title of Prasadians.

A director knows when he gets his model,
A musician knows when his instruments are in best condition,
Similarly, we, being Prasadians,
Know this is the best college.
Parents teach us about the society and rule,
Teachers teach us about book and knowledge
And Prasadi rules help us to maintain the things we have learnt.

Prasadi : Lying in the Core of My Heart

“Memories warm you up from inside, but they also tear you apart”. The thought of leaving Prasadi has left sadness in my face but the memories created here shall always enlighten my heart. Before I could even realize these two years are about to end. It feels like there is a big part of me inside Prasadi and immense part of Prasadi and the memories created here have wound up inside my heart.

Looking back at the 1st day of Prasadi, lost in new faces and struggling for existence, I feel like how far has the time pushed me. Though I had hard time, I am sure there is no better place than Prasadi. The knowledge gained in Prasadi is an incessant success to our lives and my friends are a plus point to every experience I had in this institute.

Being a part of Prasadi was a joyous moment in my life and by the end I found myself enjoying every moments in Prasadi though it was a bit hectic in the beginning but by class XII, it was the homework I enjoyed the most. All the teachers and the way they taught had made a great impact on my mind. The jokes they cracked making the moment lighter was a relief from those complicated chapters for the time being.
The friends were an incredible support making the days in Prasadi an unforgettable one. The togetherness and the unity grew each day. Combine study with my friends was really a fun...

Summing up the moments in Prasadi, I found the Chief Sir’s lecture most memorable, enthusiastic and encouraging. Everytime, he came up to our class the passion for studying and doing something seem to rise in up. Further, the teachers of Prasadi were a helping hand and my friends were worth mentioning, they were the catalyst to every moment in Prasadi. Hence, every moment I had in Prasadi will remain fresh in my heart and mind forever. I am going to miss every single day in Prasadi.

Unforgettable Moments in Prasadi

There were several such moments which will last with me for life long. Specially the love and care of teachers, friends and staffs. I still can’t believe that we are at the end of our college life. Life in Prasadi was somehow as I thought in the beginning but soon I realized it was for our betterment and got used to it. Those moments spent in Prasadi will always be in my memories. The fun we had in picnic. I never expected I would even dance in my life but I did. Whenever I think of those moments automatically smile comes on my face. The classes which I attended were very precious to me. May be in the beginning I wasn’t that serious but soon I came to realize the moment which would decide our future. But still there are some tones of teachers which can’t be ignored. The argument between Rahul and BCG Sir for every questions. I can never forget some funny moments and the teachers funny dialogues. The mostly used dialogues of some teachers:

- BCG Sir: ‘aille halla garchas stupid’
- YKG Sir: ‘How easy? ullu de great’
- DD Sir: ‘you are excellent’
- BKTM Sir: ‘tero navaeko jhardinxu, halla nagar’
- SK Ma’am: ‘room No :8’
- RKS SIR: ‘nice cup of tea’
- RPY Sir: ‘don’t observe it, absorb it’
- SBH Sir: ‘I will cut your head, ghhans haru kei aaudaina’

Those moments won’t ever be lost. The knowledge we get from our seniors and teacher was very precious. Our Chief sir, who guided us in every steps will help to achieve success. They might forget it but I won’t ever let it go. In future, I don’t know where I might be but I will always miss each and every moments of my college life. Those funny tones will make me remember what we had done. The moment of when URT Sir warned us for long hair, GT Sir calling for explanation of leaving classes. Each and every friend of my college, specially J’12’ boys, I will really miss them a lot. In class 12 I rarely got a chance to understand my friends, maybe due to several misunderstandings. If anyone had ever got hurt with my words, I appolosize, but I never wanted to. Each and every members of college who helped me will always be in my memories. Thanks to all. Hope you all have a great life ahead.

When there is so much love for someone, when there has been so much of happiness and joy, it's natural to be reluctant to close that beautiful chapter. Whatever it may be, but it's always important to know when something has reached its end; finishing chapter, saying goodbyes, it doesn't matter what we call it, but what matters is to leave in the past memories that are over. But I think the memories in prasadi are going to haunt me forever.

When I had entered the gate of Prasadi, I didn’t have the slightest idea that I’d be so attached to it that it’d be heart breaking to leave it. The period of two years was really a golden period of my life. I was in O’10’ section in grade 11, a morning section. Oh! My god it was really a Hercules task for me to get early in morning. But I am glad to state that I was never late for class. Getting loads and loads of homework and managing time for entertainment in this hectic schedule was really a challenging job. Despite that heavy schedule I managed time for everything. Classes of BCG sir, SBH sir, RKS sir, SK ma’am, BM ma’am SSA ma’am, RRG sir are like the vivid pictures printed in the memories. Jokes of SBH sir, BCG sir’s yesterday and the way of RKS sir relating every derivative of Physics with tea are really unforgettable. Cracking jokes, giggling in class, and gossiping are the fresh memories that can’t be erased. The time that I spent with my cute friends Shrinkhala, Mona, Anupa, Monika, Rijju, Upama and Sanjana.

As I travelled in time and got flash backs of those moments I felt an incessant energy flowing through the synopsis of my nervous system that guides to the world of heavenly pleasure. I have no words to express the gratitude to my friends and teachers. I just want to say “THANK YOU” to all for helping me to become a better person each passing day.

“Prasadi with My Unforgettable Moments”

My 1st day at Prasadi is still fresh and it’s already time to say goodbye. “Prasadi” the number one college in Nepal, which has been regularly rewarded with National Academic excellence award for almost a decade, is a great example of success in itself. Prasadi has become the ideal platform where one can bring best out of himself / herself. Prasadi does not only promise to give quality education but, it helps to build up good discipline among the students.

I have spent lovely moments of my study in the ambience of Prasadi and from my experience I could confidently claim Prasadi as the best alternative for your bright future. In these two years I have collected lot’s of unforgettable and cherishable moments in Prasadi. However, there are some sweet as well as bitter memories spent in Prasadi. First memory that comes on my mind is about doing lot ‘ of homework till midnight, carrying the heavy bundles of books and copies, hurried departure from college gate etc. Sometimes there would be surprise bag checking. Special memory is about unexpected visit of chief sir. Whenever our chief gave us speeches my intensity for study increased. It was really fun to attend the speeches of chief sir. Chief sir’s strict rules to control the students and brilliant mind and his effort to make us perfect individual is the thing that we all Prasadian must salute. So, I heartly want to thank our chief sir. Likewise there are some sweet memories about our teachers which I never forget. Our class teacher Raj Kumar sir dialogue “haina haina”. Pharindra sir’s saying” my English is very fast yaa!!!! It will be hard for you to understand. So, listen up! Bhadra sir with his dialogue “what’s the cause?” Ram sir with his funny act during the class and last but not the least about out handsome Pankaj sir with his jokes and expression makes the class refresh. Oow!!!!! How can I forget my friends who have filled my college days with fun and laughters? My best friend Manisha who, always kept on supporting me, other close friends like Rasana , Jasmine, Hasina , rabina , Nisha, Tanjila and I will miss other friends of section O’9’and B ‘3’ too. I will miss you guys. Other thing which I’ll be missing is the time when I used to wait eagerly for lunch break and especially to go to home because the periods used to make me feel very drowsy. But now there aren’t enough days for me to wait for 11:10 Wow! The moment of Picnic was superb with wild dance I couldn’t forget every moment spent in Prasadi with my friends and teachers are truly memorable and unforgettable. I’ll cherish all those moments forever.

Lastly I would like to say that “if a drop of water falls in lake, it has no identity, but if it falls on a leaf of Lotus it shines like a Pearl. So, choose the best place where you would shine. Try to take every moment in Prasadi as a golden chance so that you won’t have to regret later. As we know time and tide never waits, the time is near to change us from Prasadian to ex-Prasadian. As I come Prasadi alone but I’m leaving it with lots of unforgettable and cherishable moment with my friends and teachers.

Days in Prasadi Academy

I have completed my two years in Prasadi Academy but it seems as if I have joined recently. The time which I spent in Prasadi is really very special for me which I can’t get back. The thing I can take for whole of my life is memory.

Before I joined this college I heard from people that this college was strict, full of rules and regulations but I don’t think it as strict as I heard. I found Prasadi Academy’s teachers were very friendly. Obviously, Prasadian are not allowed to put on cosmetics, make their nail long and for boys long hair. People think its rules but in my opinion its necessity of students to be in a proper uniform.

The first day of class XI when I entered Prasadi there was a lot of questions in my mind. How are the teachers going to be like, whether I would find friends or not? Actually my only one best friend have joined Prasadi Academy but she was in D’11’. I entered the class and introduce myself to few friends. Within a week I got closer to each of them. Our first period was Nepali and I was the most recognized student because on the very first day during attendance I presented lovely and whenever I spoke I was caught by him. Second period was of Nagendra sir, he always encouraged us and he was one of the caring teacher as well. Likewise, the third period was of Amala ma’am which was also quite interesting but I would always ask Rabina about time because after that we had 20 minutes break. Fourth period was of Saroj sir which was interesting as well as encouraging. Whenever he asked me question my friends helped me and one day I was caught and we three had to give presentation. We three (Fameeda, Rabina and me) were called 3idiots by him. And lastly it was Rajkumar sir’s period, he used to say “Haeena” after completion of his every sentence. He used to entertain us by giving 30 second break after completion of every topic. I must say every moment I spent in O’7’ was really great.

Finally I stepped in class XII B’6’ after completion of grade XI. I thought, I would be separated from Rabina and Femeeda but luckily it didn’t happen. Out class teachers BRR was really encouraging and second period was Economics and we were really very happy after we found our Nagendra Sir as our Economics teacher. Third period was of Manju ma’am which was very inspiring and encouraging for me and espically when she assigned us task in class. I would do it as fast as I could so as I get “good”. Fourth period was Tara ma’am “business period”. Fifth period was maths and it was interesting period. After 11:05 I would wait for sir to say “girls”. I found myself very lucky because I was able to attain Ratna Man Dangol sir’s class. His class was just unforgettable. His jokes, way of teaching, I like his way of teaching very much. And we also got opportunity to attend Megh Nath Dangal Sir’s class.

I enjoyed a lot these two years. I got to make more friends, learnt about people’s nature and many more. At last I would like to thank all teachers, friends who supported, encouraged, and inspired me throughout the year.

Flashback……..

Closing my eyes, I could see a very dim vision ahead and notice two gateways to lead my life ahead. I have come to realize that the time has come up with an alarm to make me alert about building up my career. Among two gateways, one seems to lead very easy path and next seems to lead very hard one but has got fruitful future. I have arrived to a real journey to my future. I’m scared and wish to stop this time and make static. But knowing that time is most precious in the world that never stops for anyone behalf of begging and cries, why am I making this foolish wish? Though I know all these things I am getting much more frightened.

Before I walk ahead I want to have flashback to my most memorable days in the past. And for making my past colorful, my college life pays most. With a new hope, I joined Prasadi Academy for my +2 studies. It is common for everyone to be a bit nervous at new place and with new faces. Likewise, some months were lost to get adjusted in a new environment. Study burden during exam time due to no gap in between, late night stay just to complete home works, fun with friends, eating during class hours etc strikes my mind till now. These two years went just in a glimpse. During these years, we became familiar with many faces, teachers and some teachers repeated words are fresh in my mind. Some of them are RKS sir’s chiya jokes, BCG sir’s ‘you stupid’, YKG sir’s ‘very easy’, DD sir’s,’ you are excellent, etc. wonderful moments will always remain in my mind. Likewise, the point has finally to be departed from Prasadi life. It is said that we begin to see good aspects about something or someone when we realize that we are soon about to lose that or them. Now I’m worried about losing my college life but as time and tide wait for none, I should walk ahead. The things that I have got from this academy is priceless.

Now, winning my fearful mind I should go ahead in life, achieve something, build up my career. I should accept the time. Though, I had a good time in Prasadi, I willingly also couldn’t stick to it. So, it’s the time to bid goodbye to prasadi. I could never ever forget the wonderful moments of college life. Lastly, I wish for the prosperity of this academy.

Party in My Mind

No matter how the burning our feet were and limited platform we had, we, the students of grade 12 Science had forgotten all the worries and yet we danced wild! This was a part of the picnic for grade 12 science which was on 13th February 2013. We excitedly gathered outside the college premises, boarded on the respective buses to set off to our trip to Tribhuvanpark, Thankot. We all were excited to be there. On the way we sang and played in the bus. As soon as we had reached there, we filled our stomachs with light refreshment and we took rest. As the music started, all the students were on the floor dancing. This day was very ‘BIG DAY’ for us. After two years of long hectic and tiresome homework and study business, we finally had a time for ourselves and we spent the day with our friends with whom we were never together due to the limitation of time in the college. That day I saw many of my friends including me whose feet got frozen while dancing with the music. Maybe it was the ‘MOST MEMORABLE’ day of our high school life. On the way back home, the dancing hangover had not gone. So we were still like “PARTY IN MY MIND”

Life in XII B3

XII B’3’ is the worst class
This is what you may have heard,
We are one united mass,
All you have heard will seem absurd.
Some classes are boring
And tension is always growing,
Yet we manage to have fun
And get all the homeworks done.
We don’t know from where to start
All friends seem so nice,
Here friends aren’t two faced
But have more faces than a dice.
Shriya is the brilliant one
She is first in everything
Amita and Poonam are fashion queen
Sajun, Aaditya, Krishna are happy teens.
Rajkumar, Suyash, Silon, Jasmine are silent & hardworking
Sama, Getson, Upasana are most of the time joking
Hasina and Rahul are window peeping
This class can make the teachers fuming.
All of us are the best of friends
Jasmine know the latest Bollywood trends
Parikshya is very good friend,
Suyash and Sanjay are trying hard to blend
Anish’s cheeks get red when he is shy
Velin is too busy to say hi
Ashma is always on time
Ishana and Shraddha’s voice sounds like wind chimes.
Then comes friendly sulochana, Niran, Santosh, Aparna
Who’s polite to everyone,
Where would we be without Getson, Sama?
They bring all the fun.
Aishma and Ishana
Aren’t very tall
I don’t know much about Nemika
Since, she is the new girl.
Shreya is always found
Chewing lots of gums,
Soni and Nemika
Don’t talk to everyone.
Miraj and Rojit
I don’t know what to say,
Poonam and jasmine
I never see them play.

our own Ashish Basnet
He doesn’t talk that much.
Don’t get us started about Hasina,
“Blah!!! Blah!!! Such and such”
Saguna and Rabina
Always try to be the best
Sitting at the last bench always feels great
We get punished while coming late.
Oh dear!
How can we forget Sarthak here,
The tourist who’s seen few times a year
Doing homework is his only fear.
Shraddha, Isahna and Shriya
Have a divine power
When they sit at the last
Class 12 B’3’ always has a blast!!
Who did we miss????
Yes Aastha! she’s another new girl
We can’t remember anyone else,
So we guess that must be all.
Oh! our class teacher Mr. RajKumar,
He simply rocks.
And a word of “haina!haina”!
He can really box!
These years have gone so fast,
We feel bad remembering the past.
Feels like yesterday when we said “Hi”!
But time has come to say “good bye”.

Two Years in Prasadi

The two years of my life at ‘Prasadi’ have passed away so quickly that I cannot even realize that it is going to end. I think that I just entered “Prasadi” about a week ago. All memories which I had in “Prasadi” are still fresh in my mind.

My college life is going to finish in 2weeks but I still remember the first day of my life at “Prasadi”. I entered into the college with fear in my heart. I went to the notice board to see where my name was. I found my name at the end of section O’13’. I went to the class. Simran and Zoonu were my first friends in Prasadi.

I have lots of good memories with my friends like gossiping, having cheese ball and chocolates during the break time. I will miss you Punam and Jasmine, helping each other in studies and other memories with my friends are with me. My life at Prasadi is a mysterious journey where I had to face many consequences and I had to compromise with many occasion due to lack of holidays. This is all about me and my friends. But what about the hard working and determined teachers who gave us the knowledge? I would like to thank them all from my inner heart. I would miss all the teachers very much, especially Pankaj Sir for his jokes and expressions and Manju ma’am for her love and care. I will miss them.

All the memories that I had with “Prasadi” are priceless. In these two years we had lots of fun with friends and teachers. At the beginning I was really bored with the rules and regulation of college. But today when my college life is coming to the end I would like to stop the time. But time never comes back. So I am going away from Prasadi with lots of memories which will always make me happy in future. I will miss the jokes told by Sama and friendly friends Cilon, Parikshya, Ishana, Mansa, Rasna, Shreya, Sharada, and Anjali. Finally for all these memories I would like to thank Mr. Bikram Rai and say I am proud to be a Prasadian.

It’s all about Days in ‘Prasadi Academy’

On the day of entrance exam, all alone and shy, carrying an umbrella in that heavy rain, I was waiting for the gate to open; the new stage of my life began. Entrance exam was over, admission done and I came as a Prasadian in section ‘O9’. Seeing all new faces with full of ambition I chose to sit with my very new friends Upasana and Soni. Time passed and I enjoyed every day in the class, our friendship became stronger. At the end of the year everyone knew that we would be upgraded to Grade XII. Everyone thought what they would do if they got separated with their friends without whom they would get bored in every single period. Grade XI completed with full of fun in O9 in which I had many new friends with whom even every boring period became interesting; everyone felt happy and promised that they would regularly meet their friends even if they got their section separated.

Admission time for grade XII students and I was this time selected as Noisy ‘B3’ student…..confused whether I would find my friend in the same section or not…..Slowly, I went to the class…..Should I say luck by chance or what so ever I found almost same friends in section B3, I also had same bench partners. I was so happy about having a year more to spend together. Our friendship touched the heights and so our burden of studies. We enjoyed classes more, bringing a new topic every day. Days passed and the session ended but my love for Prasadi will remain the same. I will be missing all my friends, teachers, chief sir’s lectures and so on I am and will always be ‘proud being a Prasadian’.

Things that will never Return in My Life

- After Prasadi; I will never get chance to wish that there would be checking whenever I am late for college.
- I will never be called as “class ko don” by Saroj sir again.
- I will never get chance to gossip in class again being “3 idiots”
- I will never hear RKS sir telling “haina” after each correct sentence he says.
- I will never be scolded with respectful words like Bhogi sir does.
- I will never be called “chhorī” by any teacher during my classes like MRD sir did.
- I will never be frank with any teacher as much as I was with Tara ma’am.
- I will never have that smile again which comes in my face when RKN sir says “girls”.
- I will never get phone call from school to know why was I unable to attend my class.
- I will never finish my lunch, talk with my friends, read around, play and do many other things within 20 minutes.
- I will never get chance to eat samosa of Prasadi’s canteen.
- Whenever I enter in Prasadi, I will not be known as “student”, I will be known as “ex-student”.

D5, Journey from Jestha -28 to Chaitra 7

Come on guys, climb five storey building for a moment
Don’t be in dilemma… just climb it
You reached an entrance hall?
Oops! no door , no problem we have two back widows
And five side windows, we have three fans too, right?
Yaa, this is the D’5’, a journey from Jestha 28 to Chaitra 7,
Here we live a family of 47 members entirely guided by
A lot of teachers and nourished by their love and knowledge,
Oh! How I can forget those dreadful sounds of striking
Windows, frightening us time and again,
Two rows of benches, on the right it’s entirely for girls and boys have it on the left
Umm….bored? Please, don’t be … Now comes about our members.
Rohit a gentle guy whose behaviour always pleased others,
So were Mahim , Saurav and Kiran , always wonderful friends,
Anil never stopped making humour in the class,
Who was accompanied by his near mates Pritam, Saughat, Birat and Niren,
Salu, a wonderful girl, always took her first position with her laugh,
Oh! How can we miss Diksha’s cross questions along with her sweet smile?
Nabin…Oh ! god…his dedication to study’s really appreciable,
Gentleness of Abhi always made his sharp personality in the class,
So was Sailesh, always friendly, dedicated to knowledge,
Ha….Bhaskar would never forget his incident in chemistry lab with chief sir,
A really friendly and smiling guy.
Oh! Let us remember Pappu’s organic conversions, Nirajan’s calculations,
Rabindra’s smile and subodh’s gentleness
Let us not forget the friends, Nabina fine and fast & Sonali’s  nature really nice,
Sorry! We missed our captain Suraj, a hat wearing guy,
Really, difficult to identify him in the picnic.
Dancing with Ashok was really shocking and wonderful experience in the picnic.
We shouldn’t miss our talkative Pratik, always sharing his own experiences.
Aashma always turning a cool girl, perfect from every aspect,
Nisha umm…confusing right? Shrestha or Mahaseth?
It’s impossible to forget the boldness of Yashoda in her unique and cute smile,
Dakshyata, oh! We seldom saw her eyes up, wondering in her own world,
Shreya ,again confusing right? Thapa or upadhayaya?
It’s Shreya Thapa along with Samikshya having their own company definitely glad.
Let’s come to Shreya Upadhayaya, a sincere girl whose entry fills charm to the surrounding, a perfect example.
Oops! We missed Nisha Mahaseth and her bench mate,
Surakshya umm... not so frank but silent in their talks.
The things that will be memorable is Aagya laughing in silence followed by our laughter.
Let us not forget Shibu’s English tone really appreciable,
Pratigya, always remained silent, determined and kind,
Rumi, Subina and Aastha, the three bench partners, always following their principle of unity,
Reema, Alina and Pratistha were ever close friends from XI to XII and attached as a permanent magnet,
Jyostna’s hair style, Sunita’s dimple and Pratika’s smile will always be in memory of hard disk of our brain,
So will be Sabina’s sincerity and Sarmila’s mischief,
Last but not the least, we all are the pride of D5.
“Proud to be a Prasadian”

Farewell

Let me tell you today
What filled my class with fun.

They are priceless gems of D9
My awesome friends for long run.

My day begins with Raisha’s favourite song
When it comes to pranks, Pravin is never wrong.

Smily Utsav, hardly awake you’ll get
Subin is the quietest tiger I’ve ever met.

Talented Nikesh is famous for his golden voice
Anisha is the fun bank with all gossips of your choice.

Yaju has the cute evil smile, everyone adores
Sevok with his “daari des;” is a company who never bores.

Charming Sujina’s jokes never go in vain
Here comes Bhuwan, to make you smile again.

Intelligent Allen has answer to make him stand tall
Apoorva is strong one who can easily make you fall.

When it’s about talking to girls Sanyam is a bit shy
If you have a clear loud laugh, then Ashesh is the guy.

Thanking all my friends for making my years
It’s me Nikita, writing about you all biding a farewell.

By Nikita Dulal

A Journey From Dawn To Dusk

I read somewhere
That life is a journey from dawn to dusk
And was advised to be aware
While growing up in the land of fun
These two years of mine spent here
Has taught me many things that today I want to share
The first day I stepped into Prasadi I was filled with a strange fear
But now as the day of leaving this place is coming near
I want to spend my last days here with great care.
Days spent here as I look back today
Have forced me to say
“Prasadi, I thank you today”
For teaching me lesson of life every day.
This is the place where I found friends I’ll treasure all my life
And from the teachers I learnt that pen is more powerful than a knife.
Here I got the opportunity to learn to do many things in just 20 minutes
And also the chance to enjoy many sonnets.
I also tried to get in me the virtues like diligence and patience
And also tried my best to chase excellence.
Today I feel that my decision to go to Prasadi was right
As in these two years my road trip has actually turned into flight
With a goal set in front of my sight
I’m hopeful to get victory like a Knight.

Prasadi, Memories and a Salute

When captain RPY gives his slow and steady lecture;
I realize those cosmic bombardment of my near nature;
When sergeant SBH presents his lecture with humor and laugh;
I remember those music of violin with which Einstein justified E=mc²
The morning tea; and those vibrating waves at its surface;
Make me visualize those words of colonel RKS
The sense of courage and spirit forces me out;
With the powerful words of sir JPY scholar.
Those scolding; full of love and warmth;
Is better experience in RL’s class.
These all memories rise violently in my mind;
Anywhere when I see sir KBP’s facial emotions.

Two years of Our life.....

A part of our journey has been come to an end
Something started and will finish as the trend
Seems like it’s only yesterday that we started
But today we’re here to be departed.
We still have long way to go
We have our journey to complete
Yet these two years will be treasured the most
Though there are things we gained and things we lost

These years of our life are the most cherishing
As it’s full of memories, learnings and bondings.
In this short time
Teachers taught us to learn better
And our friends taught us to be better
So even though this phase has come to an end
You’ll all be remembered in every step and every bend.

By Sneha Shrestha
XII D8 Science
If you ever make a mistake and follow up the noise
you’ll end up to XII D2 at top of their voice
you’ll always find SK ma’am shouting hey!
Because this is the class where devils play
Shouting all wild to shake the whole block
And when you see Kushal sitting all quiet it is a shock
Anupa’s voice is heard when moon is blue
Monika’s hair is best in class and that is true
Asif is known as hero of our class.
Ujjowol, Pratik and Pramod are so cool always ready to make a blast
Dilkash is a guy still unknown to us
‘Homework garyo’ is what Manjila asks you first
Shrinkhala is sweet with strong determination
Here is Sammit who is laughing Buddha’s 13th incarnation
Riju is not meek as she looks
Neha can get lost in the world of books
Saurav is a guy who is silent and shy
Aayusha is always engaged in books, we don’t know why?
Smiriti the genius is always so sweet
Om Prakash in class is always mute
Who can beat Upasana’s wonderful art
Without Rajand, Nirman, how can anyone laugh?
Sanjana G and Sanhana Y are friends forever
Talking about breaking down makes Mona feel better
Though not by looks Astha studies a lot
Look how beautifully Chandra speaks Nepali, Oh my god!
Here is Nitesh speaking faster than uv radiation
Bikram is the guy with mind and creation
Who can ever beat Imtihaz’s caricatures
Richa the girl with shrill voice is of helping nature
Sandip J and Sandip P thought competes are good friends
Here is Pratibha whose confusion never seems to end.
And this is how the devils of XII D’2’ are cool
We are tortures for teachers, and break our own rule.
And if you give history a rewind you’ll know XII D’2’ is just one of its kind.

By Pratibha Acharya

An Interview with Bhimlal Gurung, Member secretary of HSEB

Bhimlal Gurung, born in 2007 B.S in Kushma of Parbat district, started his career as a teacher of primary level. After 34 years of involvement in the field of education, Gurung is working as member secretary of Higher Secondary Education Board now. He has had an experience in this field from lower level to policy making. He got opportunity to serve as a primary teacher and later as a principal of secondary level. Gurung entered the job of officer in 2034 BS and promoted to Under secretary, Joint secretary and policy maker respectively and finally appointed to assistant general secretary of UNESCO by Nepal government.

Gurung, who did Bachelor degree in humanities from Prithvi Narayan Campus and Master’s Degree in Education from Tribhuvan University, claims that he attained this status because of his creativity, intelligence, and ability of his own. Parents’ awareness to education encouraged him to know the value of education and got interested in continuing his education, says Gurung.

A Dialogue of prasadian with member Secretary, Gurung.

How is your tenure going on as a member secretary?

It is going on comfortably, satisfactorily, and pleasantly. Really, it is my pride to be appointed to such a prestigious post of a member secretary of Higher Secondary Education Board and to undertake my duties and responsibilities. While working being service oriented, life becomes pleasant and self satisfaction prevails. Thus, it has become the moment of joy for me to work as a member secretary.

You are working in the field education for a long time; what do you say about the condition of education in Nepal?

There has been rapid development of education in Nepal. Destination is not so far while talking about the expansion of access in terms of basic education. In secondary and lower secondary level, there is the situation to be initiated little by the government. But we have to work further for the improvement of the quality education.

How have you contributed to the development of education in Nepal as you have worked in this field for a long time?

Basically, I spent my professional life in the field of education. During this time, I worked a lot for the promotion of education by undertaking different roles related to this field. I have contributed my best from my side but an attempt of an individual is not enough. People involved in the field of education should be active as per the policy, purpose and objectivity to achieve the goal. There has not been long term thought, goal, policy and programs of education for eight years or so because of political instability. So, now we are in an uncertain situation. This situation is sad but I am optimistic that our education automatically takes its speed if as politics gets stable. Now the whole state has got entangled in transition, leave it alone the education sector.

It is said that Nepal’s education does not meet international standard. What do you say about it?

No one should evaluate Nepal’s education without any base. While talking about quality education, It has been considered qualitative which is instantly consumed by the market after the completion of certain level and that is the fact of today. It was not so in the past. Those who could not write bonds and other legal documents, the quality of SLC would be considered as meaningless. That could be termed as impractical education. The education that addresses the need of the time is practical. Later English language got its importance. Those who could speak and write English language were taken as the product of quality education. Now with the course of time, the field of occupation has become wide
and varied, so the students have to have unlimited knowledge in new field. This is how there might be the issue of determination in quality education. Now there is the demand of technical education. We are far back while seeing our education in the world. We are yet to do a lot for technical education but we have set out for it. We might be seen far back because of the absence of practicality in our education.

**What’s the reason that we are back in technical education?**

There are many factors and one of them is the need of profuse investment on it. Government should always be ready for investment. For example, to join MBBS, Engineering in Nepal one should complete +2 in science. There is no environment in many higher secondary schools of the nation to teach science program. While considering the milieu of the whole nation, it is the responsibility of the government to back public higher secondary schools and provide students with opportunities to study science, but it is scanty. Many students have studied in government schools but only few have been studied science. On the other hand, private colleges become the choice of science students since there are essential physical infrastructures that the students need. Those who study at private colleges have access to medicine and engineering and those who cannot afford for private education are deprived of technical education. On one hand technical education is very expensive, on the other hand the education of science at private colleges itself is expensive, and so the students from middle class family have not got opportunity. Very few Nepalese are capable to study medicine by paying four million rupees. Our technical education keeps on lagging behind until the government does not invest on it, or does not make environment for technical education or does not initiate to encourage the students to enroll themselves in technicle education. Nepalese students are tempted to take international certificate and students who are leaving this country for study is increasing. **What do you say about it?**

Yes, the trend of studying in foreign country has increased. The guardians too, for their status in the society, want to send their children abroad. It has become the culture of our society that if you send your child abroad for study, you feel you have position in your society. Students themselves began to think that unless they go abroad like their seniors, they lag behind. But I don’t think students go abroad for quality education. In Nepal, some institutions have already been established which are able to provide with international standard education though they are not enough. Few students may go abroad to study proper technical education, but rest students go there in the guise of student for earning. They have their opinion that they can earn themselves when they go abroad but in Nepal they have to depend on their parent’s investment. In this situation, neither the capable human resource with technical education return home nor those who went abroad for earning. All of them seem busy in earning money there except few. Moreover, they have pine for green card and PR to be settled there. It is really an irony that they are pessimistic since they think nothing happens in Nepal and it is useless to remain here.

**Who’s mainly responsible for this?**

Government is mainly responsible for this. I wonder why the government did not create the environment to prevent students form going abroad. Government should take it under consideration that if the students of this age go abroad they spend all their potential age there. Can this person contribute to the nation when s/he returns home in his/her old age? So the government should discourage these students from going abroad and for this it should be an investment on quality education and high level technical education.

**Why isn’t the investment of government getting success in the production of moderate level human resource?**

Practical education and technical education are two different things. The base of practical education is technical education. The purpose of technical education is to reinforce the practical education or develop technology. Though these two are different, there is nail flesh relationship between, them. So long as the technical education does not develop, practical education cannot flourish. We take practical education as the means of producing medium level human resource. In this context, the streams of +2 of Higher Secondary Education Board have become the initial stage of producing medium level human resources and the second is streams run, maintained, and managed by CTEVT. So those who want to have technical education later can join the streams of +2. Now new curriculum has also been developed. It has been tried to make the education practical from class 1 to 12. For this purpose government is about to run a program of a model education institution in 75 districts.

**Whether the production of technical education has got opportunities in Nepal or not?**

Those who are graduate in medicine and engineering have got opportunities but the number of unemployment is sure to increase unless industries and related business are depended. Whether it is doctor or engineer, the trend of leaving country has increased; it may be because of the halt in proper development. Our qualified resources have been provided PR and opportunities by developed countries so they have remained there. Professional people like doctor, engineer, CA, Nurse, teacher and et al are roaming to and fro with the dream of going abroad. ‘Get rich quick’ has become the trend of today’s people, so the temptation of foreign country has increased. This tendency remains the same until the country does not go on stable development. Unless the government gives hope to those who desire to go abroad, condition becomes worse and it persists.

**How much necessary do you think to provide international standard education in Nepal?**

In the changing scenario, the world has become one now. Neither we are away from others nor are others away from us. We have to make our education compatible to the education of other developed countries while the world has been globalized and there’s open competition. We don’t have any alternative except improving the quality of education.

**What should the government do for the students like us who want to study living in Nepal?**

It has been the same thing talked before. The government should be able to raise the question- Why abroad for study while there is quality education in our country? For this government should make conducive environment to stop student’s going abroad. If the government is not able to do
so, many educational institutions can be established by encouraging private sector on the basis of private public partnership. Student can be discouraged from leaving the country for quality education by generating capable human resources. There must be the situation that students see better opportunities here than abroad.

**Must we go abroad for study until there is not favorable environment as you told?**

No, no you shouldn’t go abroad if you follow my advice since many have got progress living here. Those who have been studying management should get influenced from Min Bdr. Gurung of Bhatbhateni Supermarket, other successful bankers, industrialist Binod Chaudhary and should be courageous to do something like them. If you can, you do not need to go abroad, Do something and show your capability to the nation. Make a status of successful person serving motherland.

**What difference do you find in higher level education of your time and now?**

To say from the perspective of quality education I don’t find any difference between education I had and now. But the crucial thing is that there was good environment for study and strong desire for study. There was not any obstacle in education but now there are lots of hindrances which have spoilt the environment to study, and it has become a problem.

**Higher secondary education is included in school education in foreign countries but it is like college education in Nepal. Why is this difference?**

It is because of the policy of the government. Initially it was said school education from class one to ten, then eleven and twelve higher secondary education. It was proficiency certificate level at university after SLC. It made the trend of being admitted at university programs immediately after SLC. This trend established the culture of calling college. Later because of globalization, there came the situation of competing with foreign education by making our educational programs equivalent to theirs. This is why the government has introduced the program of SSRP now. Under this program class 11 and 12 will not be called higher secondary school; the education from class 9 to 12 will be included in secondary level education. Likewise, from class one to eight it will be called basic education. Now, the education from 1 to 12 will be included in school education as practiced in foreign countries. Though it has been implemented as a model, it has not got legality yet.

**How have you found the condition of +2 education in Nepal?**

This structure of +2 education is in crisis since the government has granted subsidy to school education from one to ten. Teachers, salary for teachers, money for administrative expenditure all have been managed by government. Such is the case of university where education above +2 is provided. Government bears the expense of research and other physical infrastructures. But class 11 and 12 have become such a critical level that the government has not paid any attention. Government itself does not have the teachers of this level and there are no teachers of public higher secondary schools themselves. Subsidy is scanty, and though it has relieved, it is not enough for all the other expenses. Schools themselves have to manage fund. On the other hand, the private educational institutions, which have run 11 and 12, have not been supported. So there is the complaint that +2 education is expensive. This level of education has suffered a lot because of the indifference of the state. If the state had invested on public higher secondary school, there would have been good result as a return of investment, and the students wouldn’t have been compelled to join private schools.

**As per the age, attitude and the goal of students for higher education, this level is considered to be very sensitive but why isn’t there the investment of the government in such a level?**

It is so because those who have to know the sensitiveness of this level have not known at all. Government should know the sensitiveness and should not hesitate to invest on it. The main thing that the government has not noticed yet is that the students who pass SLC join class 11 and 12, and that all these are our children. We can easily realize that there is the main role of the government to keep +2 in limbo.

**If the investment is all, do you think the education of school and university would deteriorate like this?**

Well, you came to good point. Once we from Higher Secondary Board went to finance ministry with the topic of increasing investment on higher secondary education and I had claimed that the return would be good if it was invested on school and university alike. To the question "Why +2, it has been ignored?" One responsible officer said, a lot has been invested on school and university education and so education, result, and environment for education all are in chaos. There is neither discipline nor quality education. There is a good result and result in time since we’ve not invested on +2 education. There has been standard education there. He became skeptical that if it is invested on +2 education, +2 will also spoil like schools and universities. It sounds like a fact somewhat but it is not so. When there is investment on anything, monitoring is a must. Schools have got corrupted not because of the investment but because of the lack of proper monitoring. Likewise it was invested on higher
education but there was not proper management. This has worsened the environment of education. Educational environment has worsened because of the lack of favorable educational environment and skilled manager.

How do you take yourself as a successful person?
I find myself very successful because I was born in a very lower class family. I have come to this level with constant struggle. Till this date the government of Nepal has realized the need of me. I feel proud to see this. The government has kept on giving responsibility to me while I have got retired from civil service and it’s time to have rest. I have been able serve in the field of education. I’ve done good whatever I’ve undertaken. I am satisfied from the work I’ve done till date. I have been able to claim the work done with pride and confidence.

What should one do to be successful?
Main thing for success is your dedication, discipline and thought. These are keys to success to all. One should know family is a unit of society and human beings are social beings. While living help to all, good social spirit, co-operation, mutuality are all key points that one must have. One should always have the thought that I myself cannot do anything alone and so I should get help from others and others too need my help. This feeling makes a bond of brotherhood in any society. Another thing for success, one should be selfless and should avoid temptation, attachment and wrongdoing. One should go ahead with hard work, good work, dedication and perpetuation to work. These are sure to lead one to success.

What reformations have you introduced in higher Secondary Education Board after you got appointed?
There have been lots of reformations internally. It has been established trend of publishing result in time. There has been the total end of the loss of students’ academic year. We have met the deadline of admission at universities. Another visible reformation is the system of making 2/3 sets of examination questions in main subjects. It has been implemented different sets of questions in examination after trial and we have got success in it. Questions asked in Kathmandu, Poahara and Biratnagar have acclaimed the result of balanced and standard matching. Likewise, students from out of valley had to wait about two months for their transcript they can collect it in Kathmandu for their transcript they can collect it in Kathmandu office. Such facility has been provided in Biratnagar Janakpur, Hetauda, Dhungadi, Butwal, Pokhara, Nepalgunj and et. al, too. The provision of double charge has been avoided and transcript has been distributed in systematic way on the basis of registration number for quick service. It cannot be provided on the very day, it takes at least three to five days. No one can break the system by exercising the power since it has been systematized.

Then are you satisfied from the service you gave in education till the date?
I am extremely satisfied but I have to do a lot yet. Whatever is done well done, it has been appreciated by all. We have particularly provided training to the teachers of public higher secondary schools from all over the country to promote the quality of education. Though it has not been organized any training programs for private school, it has been tried best to uplift the level of education in public schools. It is yet to try to publish result quickly by replacing manual work by machine work. We are going to work with optical marks reader system soon. It will be started from supplementary examination. Now it is to record marks in computer by reading one by one and there are lots of chances to make mistakes, so it is typed in three places. And ultimately they are brought in one place and the marks are matched. Optical reader system reads the marks from checked copies and uploads in computer software and this immediately remains in system as mark sheets. The work of man will be replaced by machine and there will be more satisfaction. We are applying bar code system not to identify the answer sheets of any higher secondary schools. And we are implementing piloting project on supplementary examination.

HSEB has made rules and restrictions to maintain the discipline of students; have you found that it has been followed?
This year, we have endorsed the code of conduct of higher secondary school. Though it was publicized two months ago, it has not been followed and inspected yet. It has been decided to implement from the beginning of this session, in order to maintain quality in education. Presence of students in the class in certain days and the minimum marks in internal examinations have been settled to appear in final Board examinations. Otherwise they will be nullified for Board exams. It has been pin pointed in the code of conduct that those who have not been punished for misconduct will not appear Board exam. Likewise, any pomposous clothes have been forbidden. Code of conduct has been implemented to bind students, schools and teacher in rules. It has been done so to build character and it’s an effort to maintain discipline at schools.

Does the apparel help know students talent?
Clothes and talent are different matters but I have already told you code of conduct has been implemented only to build the character of students. Character and culture are very much important aspects in human life. Our character is our custom and culture. Wherever we go, our character goes with us. What we do beyond our culture does not give us any comfort and pride. Where there is culture there is life. Culture is our identity, so to protect our culture we have implemented rules and restrictions. Respecting seniors varies from community to community but it is full of dignity. It is our duty to save our culture which is imbedded in our psychology. It is our culture to cover our whole body; when unusual and vulgar dresses are worn it violates the discipline that has been maintained and it affects the study of students.

What should be done to update the curriculum as per the demand of time?
We are continuously modifying the curriculum. Now the curriculum of English is being amended and be completed soon. This year we are preparing the course of economics and other half dozen of subjects with amendment and these will be prescribed for teaching. It is a continual process. Curriculum should be revised every 5 to 10 years. After the curriculum has been carried out, it is necessary to monitor the practicality and importance of it.
Though it has been said to make higher secondary education more vocational and less theoretical, why isn’t it found in practice?
No, it is our policy to drive vocational education practically. The purpose of +2 education is to build a base for higher level technical education. Our institution is not the one to provide technical education, it is CTEVT. It is different that we have started the curriculum of floriculture as a vocational education. There are many such many subjects which are suitable for vocational education.

Don’t you think that HSEB has tightened more in the name of discipline?
It is a rule to wear tight pants, ride bike while in uniform and visit shopping malls and cinemas. These might not be liked by students but we have not imposed these codes haphazardly; there is the support of guardians, parents, schools promoters and teachers. According to the report of traffic police published recently 50 percent accidents are of teenager students. Some have met an accident with uniform and some without uniform. Discipline is directly connected to study. Where there is discipline there is good result. Discipline is a must for students.

What are the main weaknesses in the field of education in Nepal?
The main problem in this field is the presence of politics. It has really created problem in this field. All along with students and teachers are not left virgin by politics. Moreover, the managing committee of school has also been interfered by politics. There is no conductive environment for education at all. Another problem in education is the absence of investment by government. This field remains problematic until the government does not increase essential investment. Now the state has invested 17 percent of the budget and the educationists say 24 percent of the budget should be allocated for this field. 17 percent of budget is not enough to promote quality; it is spent on the pays of teachers and staff only.

Did you have any other field of interest except study?
I was interested in many fields. I was the best volleyball player of my time. Moreover, I was very interested in singing and dancing. There are two albums in the market in collaboration with Bom Bahadur Karki, which were published fifteen years ago. I could have done very well in the field of singing but I did not make it my career. I am the best dancer and gold medalist in dance. Years before duet (Dohori) and folk dance used to be involved in national sports, at that time one year I was the first in folk dance by defeating the competent from all over the country, and next year I got second position.

How much important is entertainment in student life?
Not only in student life, entertainment is important to all as long as until they live as it gives energy to people. In the context of students it helps them concentrate in their study.

Memories: Memories can never be beautiful without beautiful people, and in Prasadi, I’ve made a whole bunch of beautiful people! Can’t forget my sweet friends, Sushil, Sohini, Keshav, Pragya, Binod, Bhakti, Shreeja and everyone. The talks and the fun inside the class room with Shripad and Keisha and back home with Dhanya and Ishan. Our teachers are also great. Some really funny (Bunahajis) and converts. The things you lose now and then turn into gold. Best wishes to Prash and your group, make these days and my friends.  
Message: To Kushal Prasad, Do not think too hard, just listen to ur heart and enjoy u to the fullest. You won’t regret of coming to Prasadi.
